## KREMLIN & BORIS VIII to Start!

We have a full seven signed up for DIP, so why dilly? Would Dave Anderson, Drew Franz, Marcel Carbonneau, Ron Fisher, and Rudy Zodda please submit country preference lists (I already have Jim Fryling's and Fred Hyatt's). In case any of these worthies have reconsidered, anyone else interested in playing is invited to submit a preference list also. Those of the latter group not selected will start the waiting list for "Boris IX".

We also have the minimum four players for KREMLIN. I'd like a full compliment of six, so we'll keep the two remaining places open for latecomers--but no admittance after gamestart! The initial Politburo will be found on p14 as well as what I'll need from the players to start. House Rules are available p15. I'll be using my own KREMLIN Adjudicator Program to run this thing, debugging and expanding it in the process. Yes, you'll be largely free from Ms Nar's killer rolls, but she'll be dealing the Intrigue Cards.

We now have 5 for HISTORY OF THE WORLD and need just 1 more to start.

Well, 30 hours after the deadline, I've still to hear from TJ Klausutis ("Boris IV" and "Dune"), Jack McHugh ("Boris VI"), and Jeff Vendine ("Boris VI" and "Boris VII"). Since the latter was considering resigning, I'll assume that he did and assign his two positions to the only folks to submit orders for them, Wayne Morrison and David Anderson respectively. Standbys are requested to submit orders for TJ's and Jack's positions in case they NMR next time.

## BORIS'S BULLETIN BOARD

**THOUGHT FOR THE MONTH:** Once the Xerox copier was invented, private diplomacy died. There's no such thing as secrecy. It's just a question of whether it's leaked or revealed openly.  
--Andrew Young

Several folks have expressed a desire to join the SILVERTON game here but can't find a copy locally. If anyone knows a good source, let me know.

We've had several similar comments about 1829, so you'll find our capsule summary of the differences between 1829 and 1830 on p11.

Also, John Butitta is going to Oklahoma City soon for a conference would appreciate getting hooked up with any gaming clubs there or even individual gamers. If you know of any that might want to teach him a lesson, drop him a postcard. The PDO 1993 census only shows three pbm'ers in OK, but two of those are/were in OK City.

Ballots for the Runestone Poll appear on p18.

## BOOS & KUDOS

This month's Madame Boiduc Press Excellence Award goes to Brad Wilson for his article datelined London in "Boris VII".

This month's Ms Nar Super-Sudsy Bomb goes to Flapjack McHugh and TJ Klausutis for non-submission of orders.

# RIOTS IN ITALY? WORMTONGUE AT 16! Fall 1913

CLIFFHOME--Riots in Italy, no doubt kindled by Austrian agents, have offered Wormtongue a golden opportunity to quickly achieve victory. Should he win the guessing game around NAP next year, he'll need but one center from amongst BER, MUN, TUN, SPA, or PAR to wrap things up. Germany and Italy being under-strength may be a critical factor here as will be which unit Lord One-Eyed will disband.

## CLASSIFIEDS

Kom! Kom, children and hear the story du Monster du Moscow. Was very kold night when the sun koms back from his vinter nap. De monster of de Moscow had put forth de snaky neck to gobble the city of the Saint in one big gulp.

Much like Erik ate his apple struddle, Ya? No look so like the little lamb Erik. Ve saw you but I have more for de morrow.

Olaf the sailmaker was much scared that the monster would soon hunt viking children to munch on. Looking on his little Helga he decided he must stop the monster of the south. So, he vent out in his viking ship Hammar of the Sky to seek help in slaying the monster.

On his vey, he hear thunder as he go by the swedish headlan of oorsk. There was no clouds so he pull 'round de headland and there was big horses with metal men on top. Dees men would ride de horse toward each udder an' try to poke each udder with long sticks.

Olaf say to himself, "Self, thees metal monsters may help slay the other monster." So, Olaf hailed the metal things from de ship. An' Olaf was much feared for the mouth of the metal monster opened and a mens head appeared. Olaf was sorry that the man had been eaten and told him so. The man laughed and said he was Oberst of the Teutonic Knights and his friend that was beeing on hom so was Frederick of Prussia. Oberst asked Olaf to break bread with them. Olaf scared of the metal monster was to say no till other men come out of brightly colored tents and take apart the metal monsters.

After a hearty meal Olaf told the knights of the fearful Moscow Monster. Dey said, "What ho, let us have at dis brute and make vikings safe for all time."

So that is how Olaf the sailmaker got help to slay the monster. Children go to de sleep now so I tell the rest of the story later.

## COUP IN AUSTRIA! RIOTS IN ENGLAND!

Fall 1906

Errata: Last season's Russian order of F Bal-Den failed and should've been annotated [F Bal-Den].

**WALL STREET JOURNAL**--Franz Josef has abdicated and Archduke Wayne has assumed the ancient mantle of Habsburg power. Already there are border clashes with Russian forces under the new government in St Petersburg. These signs of strife in the East may have come too late for Italy, slowly losing ground to an exhausted France. The riots in England are most puzzling. Some analysts suspect Tzarist agents provocateur, others blame the shortage of Bass Pale Ale. In any case, Lord Flapjack has been forced to call elections. The opposition party has several strong candidates so he is no shoo-in to win. The market has yet to vote on the Russian and Austrian successions. The next session will speak volumes.

## COUP IN TURKEY!!

### FRENCH & BRITS GO AT IT! Spring 1902

# VII

**MURKWOOD:** The rumored coup in Turkey has indeed come about and a new Sultan, Ali David III, now dwells in the Porte. Whether this bodes good or ill for the Tsar remains to be seen. The new Sultan will surely demand concessions from both Austria and Russia as the price of alliance. In view of the Franco-German cooperation in the Low Countries, it would appear that England is the odd-man-out in the West, but Italy is providing a credible second front against the duo. Whether it is enough to topple the Martin government is debatable. The Tsar's troubles have multiplied manyfold with the arrival of the British fleet in NWY.

#### EMBASSY BEAT

LONDON: Prime Minister Lord Holditun grumped as he perused the report of His Britannic Majesty (who this month has developed a craving for red wine and herring's) Ambassador to the Romanov Court. "I can see that the heathen hordes have swarmed over the traditionally Cossack lands myself; after all, we have consuls in Odessa and Sukhumi," said his Lordship to Foreign Minister Lord Lettithangout. "Now that rag *Previde* is complaining that we should take action. What can we do anyway? I mean it's a long way off, and we don't have a Black Sea Fleet or anything though if the damned King gets hungry for sturgeon we may soon, where it will port..." "Ahem, well, my Lord," said the Foreign Minister, "perhaps we can render financial aid to the Tsar." "Get serious," said the King's chief minister. "After succeeding Lord Billand-Hillary's spendthrift government, you know we can barely afford biscuits for tea, much less any jam. And that damned *creme fraiche* expedition to satisfy the King's list for strawberries...expensive, and how do explain that it to the French? Hardly looks friendly..." "You're rambling, sir," said Lord Lettithangout. "The response you wish me to make to our Ambassador?" The Prime Minister glared at the situation map of Europe. "Tell him to point out to the stupid Tsar -- can you believe our royal houses are related? I mean, maybe you can, with our soldiers chasing after cream in Flanders and the Russians farting around..." "Sir?" "Oh, yes, tell the Tsar that God helps he who help themselves and maybe that army squatting in PRU just might be better employed on the southern front. I mean with this ultra-militaristic France with a mindless ninny in Rome aiding and abetting him, Germany doesn't need the distraction. Nor do I, not with the King gaining new desires every minute, hope he never gets to like yak. Tibet's damned far away, and the railroad up from Calcutta's crowded right about now with monsoon escapees, getting a yak-catching force up there will be a sight..." The Foreign Minister slipped quietly out after grabbing a dish of fresh strawberries and *creme fraiche*.

ST PETERSBURG--The West continues to ignore the troubles of the Easter peasants.

## BOURSE

### Alda-Chur

This game is pegged to the results of "Boris VI" on p 3. Each country's currency is worth \$1 per center held. The player with the highest worth at game's end is the winner. As it would be difficult to be competitive starting this late (with \$1000), this game is closed to new players.

#### FALL 1908 ACTION

Kroner, Pound, and Franc are unchanged at \$11, \$7, and \$3 respectively. Lira falls from \$2 to \$1. The Ruble moves from \$11 to \$12.

RETW has been closed and cashed out at \$2293.

The Alda-Chur Bourse is open this season.

### BOLDHOME

This game is pegged to the results of "Boris VII" on p 4. Players start with 1000 units of each surviving European currency (current value given on the "Per" line below). For every 100 units of currency bought or sold its price will go up or down 1¢ to a minimum of \$0.01 (exception: eliminated country's currencies are worth \$0.00). A player may never sell more than 500 units of a currency at a time. At game's end, scores are computed by multiplying the number of 100 unit blocks of each nation's currency by its number of supply centers and summing over all active countries. The winner is the player with the highest score.

#### Spring 1902 Action

RVE (\$100) sells 500 pounds and 500 lira (+\$815) and buys 500 rubles (-\$440). CLOWNS (\$65) sells 500 lira (+\$380) and buys 100 marks and 300 crowns (-\$445). PRB (\$17) sells 500 rubles (+\$440) and buys 500 pounds (-\$435).

Please expedite your orders. The time you save is only your own.

### BORIS'S GUIDE TO 1829 vs 1830

There are more substantial differences between the two games than using pounds instead of dollars. We'd like to list them here.

First of all, 1829 is actually four games. There are separate boards for the northern half of Britain and the southern half. The game can be played as the "Railway Game" where each player controls one set company, or as the "Business Game" which is analogous to 1830. We shall concern ourselves with the latter.

There are only four Private Companies; they may not be sold to Corporations although they may be sold to other players. They count towards total worth (even if closed) at game's end. There are also five Steam Packet Lines that are available that will increase the revenue of railroads that have a token in their ports.

Like 1836, the major corporations are available in a set order at a set initial price. All shares in a corporation must be sold before shares in the next corporation can be bought. Corporations float at 80% sold and go into Receivership when 60% is in the Pool. Payment/nonpayment of dividends is the only thing that affects a stock price. Shares <£30 don't count toward certificate limit and corporations whose shares <£10 (£7 northern board) are bankrupt and out of the game thereafter. Corporations come out of receivership when both someone has enough shares to assume the Director's Certificate and there is <60% of the stock in the Pool.

A "Share Dealing Round" (SDR) ends when nobody buys (not buys or sells) once around the table. You may not buy and sell the same certificate in the same SDR. Steam Packet Lines become available when the first corporation (LNWR) does.

Placement of tiles is dependent upon the location of a corporation's survey party (SP). Tiles can only be laid in the hex that the SP is in. SPs can also become tokens to establish railheads. SPs move any number of hexes in any one direction (along the hex-grain). The tile they lay need not connect to any established railline. They can block each other.

Runs must begin and end at a major city. This is so "unduly restrictive" that an Optional Rule is offered to allow trains in Phases 1 & 2 to be combined together and run as a train one larger than the larger train. Thus two 2-trains would function as a 3-train, a 2- or 3-train with a 3-train acts as a 4-train, and a 2-, 3-, or 4-train with a 4-train as a 5-train.

There are four Phases in the game corresponding to Yellow tiles, Green Tiles (3-train bought), Brown Tiles (5-train bought, 2-trains scrapped), and Gray Tiles (7-train bought, 3-trains scrapped, Privates closed). There are no 6-trains.

There are two kinds of money, pounds and company script. Players hold pounds, corporations are paid in script and use it to operate. Dividends, of course, are paid in pounds; everything else a corporation does requires script.

The game ends at the end of the OR that the Bank runs out of money (not script). Private and Packet Line face value, cash, and stock value are tallied and he or she with the most wins.

TABLE 1  
Game Features as a Function of Number of Players

Players	Cash	Cert Limit	RR	2-	3-	4-	5-	6-	7-trains

# THE HUNT

Buttita Leaps Ahead!

THE HUNT is a word game inspired by James Lipton's book, "An Exaltation of Larks", where we propose a noun and the players are asked to propose a collective noun to fit, such as "flock" for "sheep" or "pride" for "lions". Boris and Ms Nar will rank each entry for each word and the best score will be the winner. Each word a possible 1 point, but the point will be split if either more than one player suggests the word or two or more words are ranked equally. The first player to score 10 points wins six free issues of this rag or nine issues of Brad Wilson's *Vertigo*. THE HUNT is run in Chases or rounds. We report the 1st Chase and begin the 2nd Chase of the 3rd Hunt. Gentlefolk, mount your steeds! To the Hunt!

## KREMLIN

I'd like to start next issue. We still have room for at least two more players, so if you're interested, just jump in. Here is the initial Politburo:

Party Chief:	Nestor Apparatchik (A), 80, +
KGB Head:	Antonj Talksalott (J), 67
Foreign Minister:	Iwan Manjak (P), 61
Defense Minister:	Sergei Eatstumach (M), 64 (s)
Ideology Chief:	Victor Wasolin (Z), 50
Industry Minister:	Diwan Palevrian (G), 70
Economy Minister:	Karel Krakemheds (E), 72 (s)
Sports Minister:	Tigran Zenjerplan (Q), 60
Candidates:	D, H, O, R, W
People:	B, C, F, I, K, L, N, S, T, U, V, X, Y

Your three Intrigue cards are: #\_\_\_\_, #\_\_\_\_, & #\_\_\_\_.

I need your faction name (cute acronyms encouraged), your initial IP allocation, and your orders for Turn 1, Phases 1-4. Conditional orders for card plays are urged.

Lifted from Vince Lutterbie's "Down At The Mouth"  
(Advanced Game version)

1. The advanced rules as supplied in the game will be used except as modified in these rules.
2. The first set of orders mailed in by each player will be the distribution of the 56 allocated I.P. These IPs need not be declared yet, merely allocated.
3. Each turn is generally divided into two (2) mailings, (i.e. for each turn in the game, the player sends in two sets of orders). The first mailing consists of the Cure, Purge, Investigation, and Health phases. The second mailing consists of the Replacement, Rehabilitation and Parade phases. The GM reserves the right to separate the turn due to a radically unpredictable intrigue card usage, (i.e. assassination attempt, blackmail, etc.).

4. The following occurs in the first mailing:

**CURE:** Each player may move any Politburo members he controls into/out of the Sanatorium.

**PURGE:** The Player controlling the KGB, Ideology, Party Chief, and Industry chiefs may write purge attempt orders. Only one of those characters will actually have the chance to attempt a Purge; however, since the others do not know who will be active or if a "first purge attempt" intrigue card is used, all characters should have Purge Phase orders just in case.

**INVESTIGATION:** The players controlling the Defense, Foreign, KGB, Party Chief, and Industry minister(s) may attempt to conduct a trial and/or condemn a Candidate to Siberia. In addition ALL Politburo members must order Guilty or Innocent votes for each member of the Politburo in case a member is brought to trial. If a Politburo member is put on trial, any other Politburo member not casting a vote for/against the one on trial is considered to have cast a Guilty vote.

**HEALTH:** The GM makes the health roll for all members, players may write orders for conditional intrigue card usage.

5. The following events occur in the second mailing.

**FUNERAL:** If the Party Chief post is vacant, each of the Politburo members do the following:

- a.) Nominate an eligible (see Rules) Politburo member to become Party Chief.
- b.) Vote yes/no on each Politburo member in case he is nominated to become Party Chief (if no vote is ordered for/against a certain nominee, the vote is considered to be "yes").
- c.) List the Politburo members, other than himself and the member listed in a.) in order of preference, to become Party Chief (regardless of their eligibility for step a.); this list is used in case a second nominee is needed.

**REPLACEMENT:** The Party Chief (or, if the post is vacant at the start of the mailing, all Politburo members (in case that member becomes Party Chief) shifts Politburo members within the same level for no cost, promotes or demotes Politburo members one level for a cost of one stress point. The KGB, Foreign, and Defense Chiefs (actually, any character that can be in those positions after any progress by age takes place) order promotions from Candidates to Second Level and People to Candidates for a cost of one stress point. The Ideology, Industry, Economy, and Sports Chiefs order promotions for a cost of one stress point.

**REHABILITATION:** Each Politburo member may return any character from Siberia to the People for a cost of five stress Points, unless an intrigue card is used.

**PARADE:** Whoever is Party Chief at the time waves in the parade - if healthy enough - the GM makes the die roll. All Politburo members retire at age 86.

6. Advanced Game Rules:

- A. Prepare To Play: Each player will initially be assigned three intrigue Cards. Influence Points may be allocated to the sick Party Chief - Nestor Aparatschik.

- B. Resolving Influence Point Ties: Probably will cause some confusion, but we will try it. Please reread the rules on this section.
- C. Strengths (+) and Weaknesses (-): Politicians in positions of strength subtract 2 from any Purge die roll against them and the aging process may be retarded. Politicians in positions of weakness add 2 to any Purge die roll against them and age one year during the cure phase even if in the Sanatorium.
- D. Intrigue Cards: Each player can have a maximum of three intrigue cards at any one time, with the exception of Blackmail and red cards which are currently being used. When a random intrigue card is used, the GM will use a die roll for any random recipients or faction. The random amount will be a number from 1 to 6, the GM reserves the right to allow the turn to continue or stop the action until the faction publicly announces the IP's assigned to him.
- E. Bribes and Deals: The GM requires a copy of all bribes and deals made between the parties involved in order to be able to enforce the three intrigue card limitation. The GM encourages the players to strike deals where you can.
- F. Increasing Influence: At the end of the 3rd, 6th, and 9th turns a separate mailing turn will be issued for the option of publicly announcing increased IP's or additional intrigue cards. Conditional orders are recommended.
- G & H. Three Player Version & variations: Not to be used in this postal game.
7. Assigned IP's can be declared at any Point in the turn and can be conditional on any events that occur prior to the declaration of the IP's in the same mailing. If, at any time, two or more players have the same number of declared IP on a character, tie breaker points may be used. If this fails to resolve the tie, the GM decides who has control based on when the IP were declared. If the deadlock continues, the GM will flip a coin. Orders such as "declare as many IP on Bademuff to control him in the Purge Phase" will be followed if possible. Any order ambiguities will be handled by the GM as consistently as possible.
8. If a player does not send in orders for the first mailing in turn:
- Any of his controlled characters in the Sanatorium remain there, and none outside may enter;
  - His character "declines to Purge" during the Purge Phase;
  - His characters decline to conduct trials/condemnations and neither add nor remove investigations, and all votes in trials (except for a character against himself) are Guilty.
- If a player does not send in orders for the second mailing:
- If he must make nominations, the oldest eligible character is nominated.
  - All votes are "yes".
  - No shifts/Promotions are made in the Replacement Phase (except for Progression by Age).
  - No characters are returned from Siberia.
- If a player does not send in orders for the "Increase Influence" Interphase:
- He shall draw Intrigue cards to fill his hand.
  - He shall place any remaining IP on the highest ranking politician possible.

Bruck/Harry Dickson/Trigun

Dear Publisher/GM,

March 6, 1994

It's Runestone Poll time! The 1994 ballot is printed on the back of this letter. The Poll started rating Diplomacy-related zines in 1977 and has since expanded to cover GMs and subzines. I'd like you to help by distributing copies of the ballot to your players and readers—I won't be contacting them all directly.

Anyone may obtain a ballot by writing to me at the address below. Please let your readers know this if you don't want to distribute ballots yourself. You can even vote without using a ballot—just include your name and signature, indicate one way in which you participate in the North American Diplomacy hobby (sub to zine XXX, play in game YYY, etc.), and list the zines, subzines, and GMs you wish to vote for. Rate each from 0 (the worst) to 10 (the best)—no fractions, please. Do not rate yourself or your publication.

You may *only* vote for GMs under whom you've played a postal or e-mail game since July 1, 1993, and whose competence you can rate fairly. Any game qualifies, not just Diplomacy or its variants. To vote for a zine you don't have to subscribe, but you must be able to rate it fairly. This means you've seen (or should have seen if not for delays) *at least* two issues since July 1, 1993. You may not vote for me or my publications.

Don't take the Poll too seriously. This is a hobby, and our goal is to have fun. But *do* vote carefully, not out of spite, or for zines you haven't seen. On the other hand, even if you've seen only one zine you're welcome to rate it as long as you've seen enough of it to rate it fairly. I want input from everyone, not just a select few.

The Poll publication includes a list of voters. If you vote, but you don't want to be listed as a voter, please tell me by marking the spot indicated on the ballot.

I will tally the results on June 30; any ballots received after that will not count. To order the results, check where indicated on the ballot and send the corresponding fee. If you want only the pages of the Poll publication that deal with you, your zine, or your subzine, send me a SASE and let me know what you want.

Some of you may not want to take part in the Poll. If so, I respect your decision and I apologize for sending you a ballot. I thought it would be better to send a ballot and let you decide than to run the risk of omitting someone who wanted to take part.

If you have any questions, please let me know! Thanks in advance for all your help—I couldn't do it without you.

Sincerely,

Eric Brosius
